About the Seminar

Allergy and Asthma Specialists Educational Foundation is presenting the Tenth Annual **BREATHE** Allergy and Asthma Conference. The goal is to provide physicians, nurse practitioners, PAs, RNs and other health care professionals with current clinical information on common allergy and asthma topics.

Objectives: After attending the seminar, participants should be able to:

- Describe the typical symptoms of food allergies vs food intolerances.
- Describe the symptoms of anaphylaxis and treatment.
- Describe treatment options for food allergies including sublingual immunotherapy and oral immunotherapy.
- Define the symptoms that would indicate epinephrine is necessary in treatment of anaphylaxis.
- Describe factors that contribute to skin cancer.
- Recognition of neoplastic lesions.
- Describe the clinical presentation of a patient with EOE vs. GERD.
- Describe how both food allergies and environmental allergies can trigger EOE.
- Identify which patients may benefit from biologic therapy.
- Describe the different phenotypes of asthma and the appropriate targeted therapy.
- The learner will be able to educate their patients about potential factors that trigger sinusitis and exacerbate asthma.
- Demonstrate the proper administration of all current inhaler devices.
- Describe the value of spirometry.
- Describe the proper maneuver for performing spirometry.
- Describe common misconceptions or "myths" in the field of allergy.
